

### WSMP™ Connectors

Rosenberger of North America (RNA) introduced WSMP™ connectors. Based on the SMP series, this WSMP™ connector was developed mainly for space and military applications but is being adopted wherever size and frequency are critical.

WSMP™ connectors are approx. 45% smaller than SMP standard connectors and are characterized by very high-density and push-on locking mechanism. They can be applied up to high frequencies of 100 GHz.

#### Product Flyer

A product flyer contains detailed information about product spectrum, dimensions, electrical data etc.

#### Sales and Contacts

WSMP™ connectors can be ordered exclusively by RNA. Please contact
